- Communication Skills
- Ability to Work Under Pressure
- Microsoft Office
- Adaptability
- Programming
- Advance Analytical Thinking Skill
- Ability to Multitask

Employment History

2016 - Present

Present

Project Manager / Software Developer | Florida R&D Associates, LLC. | DeBary

Leveraging my extensive experience as a Project Manager and Web Developer, I excel in overseeing every stage of advanced web development initiatives. My hands-on skills in user interface design are complemented by meticulous testing and debugging processes, ensuring robust and user-friendly web systems. My multifaceted expertise also extends to the design, installation, testing, and maintenance of web systems, guaranteeing both immediate impact and long-term success. My ability to self-manage during independent projects is as strong as my collaborative skills in team settings, making me a versatile asset for any organization.

I have a deep-rooted understanding of various technologies, including but not limited to HTML5, CSS3, Firebase, MongoDB, Nodejs, Express, AJAX, JavaScript, ReactJS, AngularJS, jQuery, Java, ASP.NET, C#, IIS, Tomcat, and Microsoft SQL Server, which empowers me to lead diverse projects.

2022 - 2023

1 Years

Senior Web Developer | Victory Tailgate | Orlando

As a Senior Web Developer, I successfully produced, maintained, and modified a broad range of websites and user interfaces, each marked by their high functionality, usability, and aesthetic appeal. I routinely conducted tests to evaluate essential user experience factors like ease of use, speed, and overall quality, implementing adjustments as needed to optimize user satisfaction. I was responsible for creating tools and features that significantly enhanced user interactions, leveraging the latest in innovative solutions and technologies.

I collaborated closely with clients to tailor the look and design of websites, skillfully incorporating their vision and requirements while ensuring an intuitive and visually pleasing interface. Prompt identification and resolution of website issues and bugs were a regular part of my duties, resulting in smooth and error-free performance. Keeping abreast of emerging web development trends and technologies, I applied this current knowledge to continually elevate both design and user experience.

My role also involved effective collaboration with cross-functional teams, including designers, back-end developers, and project

managers, ensuring seamless integration and successful delivery of projects. I took the initiative to continuously improve and refine the websites under my care, proactively identifying areas for enhancement and implementing updates for optimized performance and user satisfaction. Additionally, I consistently provided exceptional customer service, maintaining open and professional lines of communication with clients to address their concerns or requests promptly.

Education

2013 - 2016

3 Years

Web Design and Development | Full Sail University | Winter Park

Full Sail University's Web Development bachelor of science degree program is designed to provide the focused knowledge and understanding needed to integrate and deploy modern websites and web applications. You'll use industry-standard tools, including modern client-side and server-side languages, database systems, and frameworks used in modern web stacks.
