Experience

Studio 953 2018 - Present

As a Senior Developer and consultant, I am responsible for system and component level development across multiple Client Platforms. Using Javascript, Jquery, ThreeJS, NodeJS, HTML5, CSS, ExpressJS, ReactJS, React Native, MongoDB. We developed SaaS platforms, CMS systems, PCI compliant API's, and world facing API's for FinTech industry. Also provide technical leadership and mentoring. Monitor team status across projects and report progress to the CEO. Developed RESTful API's, design documents, release plans, and provide feedback during design established peer code reviews.

Thinkful 2018 - Present

As an Instructor and Mentor, I teach Full Stack Development starting with Front End Development - HTML, CSS, JavaScript, JQuery, UI / UX , ReactJS, Angular, Then we move on to Back End Development with ExpressJS, Node.JS, Restful API's, MongoDB, Mongoose, authentication standards like OAuth 2.0 & services like JWT.

Valintry / HR2 2018 - 2019

As a UI/UX Engineer, I was responsible for creating intricate designs from concept to development starting with wireframes to building a reusable interface components with HTML AngularJS, CSS, SaaS, JQuery, Kendo, ES6. Also worked in the agile methodology by briefing team in Scrum meetings, suggesting story task and approximating efforts.

Florida R&D Associates 2016 - 2018

As a Senior Developer, I was responsible for system and component level development across multiple client platforms. Using Javascript, Jquery, ThreeJS, NodeJS, HTML5, CSS, AngularJS and ReactJS. We developed a complex simulation arena using several web technologies. I also provided technical leadership and mentoring. Monitored team status across projects and report progress to the CEO. Developed PCI complaint RESTful API's, design documents, release plans and provided feedback during design and established peer code reviews.

Orlando Magic 2016 - Contract

Worked on research, Search Engine Optimization (SEO), audit and analysis of deep links and the creations of metadata.

University Of Central Florida 2016 - Contract

Taught fundamental concepts and coding techniques of computer science, HTML5, CSS3, Bootstrap, Jquery, JSON, Ajax, Javascript, MYSQL, MEAN stack, Laravel, Data Structures, Object Relational Mapping, Firebase and MongoDB.

Experience

2016 - Contract GYLD

As a Senior Lead Developer, I was responsible for the main web app's architecture, UI/UX, and back-end. I worked delivering wireframes, front end components, RESTful API and deployment automation. Worked closely with AWS, NodeJS, Illustrator, Photoshop, AngularJS, ReactJS, jQuery, ExpressJS, Gulp, JWT, Sass, and others

2012 - 2015 Marys Enterprise LLC

As Lead Developer, we Developed web applications from start to completion, which included working on building individual solutions for our clients and creating a custom approach to specific client needs. Focused on rapid prototyping to ensure that our projects are connected to the web and cloud servers. Thereby making it part of the Internet Of Things (IOT).

Achievements

2015, 2016 & 2018 NASA Developement Award
2014 & 2015 Code Day Orlando

Education

Full Sail University

My Web Design & Development degree covers both Front-End And Back-End development. I learned to develop concepts, software, and publish standards-based content for a variety of formats, including the Web, smartphones, and Tablets. Working on these projects, enabled me to master multiple technologies used in interactive design such as HTML5, CSS, JSON, AngularJS, JQuery, JavaScript, and more. It gave me a well-rounded skill set.

Skills

JAVASCRIPT   JQUERY   JSON   HTML   AJAX   CSS
ANGULARJS   RESTful APIS   GRUNT   GIT   THREEJS
FRONT-END DEVELOPMENT   BACK-END DEVELOPMENT
ARDUINO   MONGODB   PHOTOSHOP   ILLUSTRATOR
FIREBASE   CODEIGNITER   EXPRESS   JQUERY UI
SaaS   SOCKET.IO   NODE.JS   MATERIALIZE   CASPERJS
GULP   LESS   BOOTSTRAP   FOUNDATION   EXPRESS.JS
PHANTOMJS   GITHUB   TFS   PYTHON   AWS   AZURE
AG-GRID   REACTJS
